

SEQUESTRANTE 873

Polyacrylate-based complexing agent.

Chemical-Physical Characteristics:

Ionic character:	Anionic
Physical aspect:	Colorless or slightly straw-colored liquid
pH (5% solution): 7 ± 1	pH (5% solution): 7 ± 1
Storage stability: Excellent in normal conditions for at least 6 months.	Storage stability: Excellent in normal conditions for at least 6 months.

Properties - Applications:

The SEQUESTRANT 873 in addition to having a strong sequestering power against calcium and magnesium salts and metal salts, also has an excellent dispersing and suspending power even in strongly alkaline baths. SEQUESTRANT 873 is also used during bleaching with hydrogen peroxide to avoid the formation of iron salts which could cause yellowing and decreases in whiteness.

1

Dosage:

For alkaline purge minimum quantity: 1-2 g / L

For bleaching with hydrogen peroxide minimum quantity: 1-2 g / L
